MARANTZ DESIGN AND SERVICE

Using superior design and selected high grade components, **MARANTZ** company has created the ultimate in stereo sound. Only original **MARANTZ** parts can insure that your **MARANTZ** product will continue to perform to the specifications for which it is famous.

Parts for your **MARANTZ** equipment are generally available to our National Marantz Subsidiary or Agent.

ORDERING PARTS :

Parts can be ordered either by mail or by Fax.. In both cases, the correct part number has to be specified.

The following information must be supplied to eliminate delays in processing your order :

1. Complete address
2. Complete part numbers and quantities required
3. Description of parts
4. Model number for which part is required
5. Way of shipment
6. Signature : any order form or Fax. must be signed, otherwise such part order will be considered as null and void.

SHOCK, FIRE HAZARD SERVICE TEST :

CAUTION : After servicing this appliance and prior to returning to customer, measure the resistance between either primary AC cord connector pins (with unit NOT connected to AC mains and its Power switch ON), and the face or Front Panel of product and controls and chassis bottom.

Any resistance measurement less than 1 Megohms should cause unit to be repaired or corrected before AC power is applied, and verified before it is return to the user/customer.

Ref. UL Standard No. 1492.

In case of difficulties, do not hesitate to contact the Technical Department at above mentioned address.

VARIATION TABLE

Type:	CC3000	CC4000	CC4000F (CC4000OSE)

HANDLING CHIP COMPONENTS

(GB) WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.
When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance. Keep components and tools also at this potential.

(F) ATTENTION

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation.
Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfile le bracelet serti d'une résistance de sécurité.
Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

(D) WARNUNG

Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD).
Unvorsichtige Behandlung im Reparaturfall kann die Lebensdauer drastisch reduzieren. Veranlassen Sie, dass Sie im Reparaturfall über ein Pulsarmband mit Widerstand verbunden sind mit dem gleichen Potential wie die Masse des Gerätes.
Bauteile und Hilfsmittel auch auf dieses gleiche Potential halten.

(NL) WAARSCHUWING

Alle IC's en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD).
Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat.
Houd componenten en hulpmiddelen ook op hetzelfde potentiaal.

(I) AVVERTIMENTO

Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD). La loro longevità potrebbe essere fortemente ridatta in caso di non osservazione della più grande cauzione alla loro manipolazione. Durante le riparazioni occorre quindi essere collegato allo stesso potenziale che quello della massa dell'apparecchio tramite un braccialetto a resistenza.
Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

(GB)

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified, be used.

"Pour votre sécurité, ces documents doivent être utilisés par des spécialistes agréés, seuls habilités à réparer votre appareil en panne".

(NL)

Veiligheidsbepalingen vereisen, dat het apparaat bij reparatie in zijn oorspronkelijke toestand wordt teruggebracht en dat onderdelen, identiek aan de gespecificeerde, worden toegepast.

(F)

Les normes de sécurité exigent que l'appareil soit remis à l'état d'origine et que soient utilisés les pièces de rechange identiques à celles spécifiées.

(D)

Bei jeder Reparatur sind die geltenden Sicherheitsvorschriften zu beachten. Der Originalzustand des Geräts darf nicht verändert werden; für Reparaturen sind Original-Ersatzteile zu verwenden.

(I)

Le norme di sicurezza esigono che l'apparecchio venga rimesso nelle condizioni originali e che siano utilizzati i pezzi di ricambio identici a quelli specificati.

"After servicing and before returning set to customer perform a leakage current measurement test from all exposed metal parts to earth ground to assure no shock hazard exist. The leakage current must not exceed 0.5mA."

**(GB) Warning !**

Invisible laser radiation when open.
Avoid direct exposure to beam.

(S) Varning !

Osynlig laserstrålning när apparaten är öppnad och spårnen är urkopplad. Betrakta ej strålen.

(SF) Varoitus !

Avatussa laitteessa ja suojalukituksen ohitettaessa olet alttiina näkymättömälle laserisäteilylle. Älä katso säteeseen!

(DK) Advarse !

Usynlig laserstråling ved åbning når sikkerhedsafbrydere er ude af funktion. Undgå udsættelse for stråling.

DISMANTLING INSTRUCTIONS

Dismantling of the DAC/AF board, Supply board and Front Panel Assembly

- 1) Remove the Top Cover (pos 151) by 8 screws.
 - 2 screws on each side
 - 4 screws from the rear
- 2) Remove the DAC/AF board by 5 screws A. Be careful not to damage flex cable.

- 3) Remove the Supply board by 3 screws B and disconnect the Lever Power button (pos 6) as indicated.

- 4) Turn the crank CDC5 (pos 96) clockwise to slide out the tray assembly.

- 5) With the set upside-down, release the 2 catches C1 and remove the tray cover as indicated.
- 6) Loosen the Front Panel assembly from the bottom bracket (pos 181) by 5 screws C and 4 catches C2 as indicated.
 - 2 screws on top
 - 3 screws from the bottom side

Dismantling of the Tray Assembly and Servo board

- 1) Remove the Metal rod (pos 152) as indicated.
- 2) Loosen the Crank CDC5 (pos 96) with screw D and lift the crank arm out of the groove on the tray assembly. The complete tray assembly can be pulled out of the Frame (pos 93).

- 3) Remove the Servo board by 2 screws E.
- 4) Protect the CD mechanism's Laser against ESD by short-circuiting the flexfoil with a paper clip immediately upon disconnection from the flexfoil connector. (See Warning for more details)

Dismantling of the CD Mechanism

- 1) Loosen the Pressure ring holder (pos 90) by relasing catch C3 as indicated.
- 2) Remove the Pressure plate (pos 89) and Rotary disc assembly (pos 100) by 1 screw F.

- 3) Turn the Tray assembly upside-down and remove the CDM Lock (pos 99) by using a "minus" screw-driver to release 2 catches C4 as indicated.

- 4) With the Tray assembly facing up again, turn the cam wheel (pos 116) to bring the CD mechanism (pos 98) to the down position. Remove the CD mechanism by sliding out the 4 rubber suspension (pos 104 to 107).

Assembly of the CD mechanism and Rotary disc CDC5

- 1) Remove the 4 rubber suspension (pos 104-107) from the Support bracket (pos 114) and attached them on to the CD mechanism.
- 2) Place the CD mechanism with the rubber suspension above the mounting 4 holes.
- 3) Hold the CD mechanism in position and pull the tips of the rubber suspension through the holes in the Support bracket.

- 4) After assembly of the CD Mechanism, the Cam wheel (pos 116) and the Rotary disc (pos 100) must be re-aligned. This is done by positioning the Bearing (pos 101), pin on the Cam wheel and CD Mechanism in a straight line as indicated.
- 5) Assemble the Rotary disc onto the Bearing with the "1" printing mark facing the CD Mechanism.

Warning

Charged capacitors on the Servo board may damage the CD drive electronics when connecting a new CD mechanism. That's why, besides the safety measures like

- * **Switch off power supply**
- * **ESD protection**

Additional actions must be taken by the repair technician.

The following steps have to be done when replacing the CD Mechanism:

- 1) Disconnect the old CD mechanism flexfoil from printed board.
- 2) Connect paperclip to CD mechanism flexfoil to short-circuit flexfoil (fig.1).
- 3) Short-circuit printed board with **brass-sheet (4822 321 11197)** plugged into the flexfoil connector (fig. 2).
- 4) Remove the old CD mechanism.
- 5) Assemble the new CD mechanism into position.
- 5) Remove short-circuit from printed board connector.
- 6) Remove short-circuit from flexfoil of new CD mechanism.
- 7) Connect new flexfoil to print connector (fig. 3).

Table 1

Error code	Type	Error Description
E1000	W	Focus Error Triggered when the focus lost for a certain time during play.
E1001	W	Radial Error Triggered when the radial servo is not on track for a certain time during play.
E1002	W	Sledge In Error The sledge did not reach its inner position (inner-switch is still close) before approximately 6 Sec. have passed by. Inner-switch or sledge motor problem.
E1003	W	Sledge Out Error The sledge did not come out of its inner position (inner-switch is still open) before approximately 250 mSec. have passed by. Inner-switch or sledge motor problem.
E1005	W	Jump error Triggered in normal play when the jump destination could not be found within a certain time.
E1006	W	Subcode Error Triggered when a no valid subcode for a certain time during play.
E1007	W	PLL Error The Phase Lock Loop could not lock within a certain time.
E1008	W	Turntable Motor Error Generated when the CD could not reached 75% of speed during startup within a certain time. Discmotor problem.
E1020	F	Focus Search Error The focus point has not been found within a certain time.
E1070	W	The carousel switch is not open within certain time. This can happen when either the switch is defective and closed all the time, or when the carousel is blocked in between two disc positions. The time-out is approximately 5 seconds.
E1071	W	The carousel position switch did not close within a certain time. This can happen when the switch is defective and never closes electrically, or when the carousel is blocked in between two disc positions. The time-out is approximately 5 Sec.
E1079	W	The drawer could not enter the inside position and is opening again. This can be caused because the drawer is blocked by something and cannot go fully inside, or the drawer switch is defective and does not close.

F = Fatal error & the set stop play function W = Warning

Table 2

SERVICE TEST PROGRAM II

Note: In software version 15 and below there are some slight problems in the Service Program for the CD Test which will be resolved by running change. The problems are:

- 1) If the Tray Motor test is done with the Tray in the open position, the tray will close only after the pressing the Open/Close button twice.
- 2) If this test is performed after the Tray Motor Test, the tray may not change as selected. The test will resumed correctly if CD test is quit and restarted.
- 3) After performing the Sledge Motor Test or Disc Motor Test the set will return automatically to the "CD Menu".

WIN VERSION

The diagram shows the electrical connections for the 17V and 0V power supplies. On the left, the 17V supply is connected to a transformer with a 130°C thermal fuse. The 0V supply is connected to the same transformer. The transformer has several output terminals: RED (ACF1), RED (ACF2), BLUE (VFTD), WHITE (AC1), GREEN (GND), and WHITE (AC2). On the right, the motor is shown with its internal wiring and external connections. The motor has three internal wires: BLUE, BROWN, and RED. The external connections are: BLUE (ACF1), RED (ACF2), and RED (VFTD). The motor is connected to the 17V and 0V power supplies.

Wiring diagram for the 120V/240V dual-voltage unit. The diagram shows a transformer with primary taps at 240V (BLACK), 220V-230V (BLUE), 127V (RED), and 110V (ORANGE). The secondary has taps at 130°C (BROWN) and 0V. A thermal fuse is shown in series with the 0V line. The diagram also shows the internal wiring for the compressor (ACF1, ACF2, VFTD) and the fan motor (AC1, GND, AC2) with their respective color codes.

This exploded view diagram illustrates the assembly of a Marantz receiver chassis. The main components shown include the front panel (0102), the receiver chassis (0100), the top cover (0108), and the rear panel (0110). The diagram is annotated with numerous numbered callouts (0101 through 0283) indicating the specific parts and their assembly sequence. Key features include the Marantz logo on the front panel, the 'TOP' label on the top cover, and the 'CC4000/CC4000F only' specification for the rear panel assembly. The diagram also shows the internal components of the receiver chassis, including the tuner (0106), amplifier (0107), and various control knobs and buttons (0109, 0110, 0111, 0112, 0113, 0114, 0115, 0116, 0117, 0118, 0119, 0120, 0121, 0122, 0123, 0124, 0125, 0126, 0127, 0128, 0129, 0130, 0131, 0132, 0133, 0134, 0135, 0136, 0137, 0138, 0139, 0140, 0141, 0142, 0143, 0144, 0145, 0146, 0147, 0148, 0149, 0150, 0151, 0152, 0153, 0154, 0155, 0156, 0157, 0158, 0159, 0160, 0161, 0162, 0163, 0164, 0165, 0166, 0167, 0168, 0169, 0170, 0171, 0172, 0173, 0174, 0175, 0176, 0177, 0178, 0179, 0180, 0181, 0182, 0183, 0184, 0185, 0186, 0187, 0188, 0189, 0190, 0191, 0192, 0193, 0194, 0195, 0196, 0197, 0198, 0199, 0200, 0201, 0202, 0203, 0204, 0205, 0206, 0207, 0208, 0209, 0210, 0211, 0212, 0213, 0214, 0215, 0216, 0217, 0218, 0219, 0220, 0221, 0222, 0223, 0224, 0225, 0226, 0227, 0228, 0229, 0230, 0231, 0232, 0233, 0234, 0235, 0236, 0237, 0238, 0239, 0240, 0241, 0242, 0243, 0244, 0245, 0246, 0247, 0248, 0249, 0250, 0251, 0252, 0253, 0254, 0255, 0256, 0257, 0258, 0259, 0260, 0261, 0262, 0263, 0264, 0265, 0266, 0267, 0268, 0269, 0270, 0271, 0272, 0273, 0274, 0275, 0276, 0277, 0278, 0279, 0280, 0281, 0282, 0283).
